

Be a Transformer!

into to a career

earning up to **\$70,000/year!**

Fact or Fiction?

The wages lost while attending college average \$194,020

FACT What could you do with \$194,020?

The average cost to attend a college for four years is \$101,948 for in-state public and \$212,868 for private college.

FACT Those numbers don't include the wages lost while attending or student loan interest. How long would it take to pay off the loans?

A four-year college degree will guarantee a high salary.

FICTION Just ask Early Education majors (\$38,000), English majors (\$38,000) or Psychology majors (\$37,000). (That's their median wage five years after graduation!)
